WHEELCHAIR TO CAR ACCESS

The IBIS® Wheelchair to Car Access has been designed and manufactured in Australia by Para Mobility. This is a transformative device that allows a person with a disability (PWD) and mobility limitations the option of getting in a car, SUV, 4WD or van.

The IBIS is designed to attach to the hinges of the vehicle door fully eliminating the need for any permanent modifications and giving users the freedom to travel in multiple vehicles. Our system is conveniently powered by the car's 12 volt auxiliary outlet and can be operated by the carer via the hand control. A simple press button action allows transfer from a wheelchair into the vehicle without any manual lifting.

By simplifying vehicle access, the IBIS allows users to travel more freely, whether for daily errands, social outings, or medical appointments. This increased mobility enhances overall quality of life.

FEATURES

- Fully portable and compatible with most vehicle makes and models
